

# FIRST Environmental Connection

## TENANT PROFILE:

# Recycling Concepts of West Michigan

Making waste useful again: Recycling Concepts of West Michigan is keeping industrial by-products out of landfills and putting them to new uses.

Using modern, industry-leading technology, Recycling Concepts converts waste products – particularly remnants from injection molded plastic processing, paper, foam, pallets and other materials – for re-use by their customers in other industrial applications.

Recognized by the State of Michigan as a Clean Corporate Citizen, Recycling Concepts has leased its 61,250 s.f. Grand Rapids headquarters and distribution center from First Industrial for more than four years and recently signed an extension to remain in the space through 2015.

Recycling Concepts of West Michigan and many more of our 2,500 tenants are committed to environmental sustainability. We are delighted to support these tenants' goals in making a healthier world. To hear more about our company's endorsement of green policies, visit [www.firstindustrial.com/environment](http://www.firstindustrial.com/environment).
